

Dialectical Behaviour Therapy Part One - Foundation Skills

Providing resources, education and clinical support to enhance the ability to change self defeating patterns of thinking and behaving.

Who is the program for?

Patients diagnosed with Borderline Personality Disorder and those who have intense, unstable moods, use problematic behaviours and struggle with relationships. Dialectical Behaviour Therapy (DBT) requires a strong commitment to therapy and may be useful in addressing their individual clinical needs.

Program content

- 3 x three week modules of:
 - Distress tolerance
 - Emotion regulation
 - Interpersonal effectiveness
- Each module interspersed with 1 week of core mindfulness

How to join

Patients interested in attending the day program will need to call the allied health department on 1300 122 144 (option 2) or contact groups at

About the program

This program is run by a multidisciplinary treatment team. It is skill based and assists patients to tolerate intense feelings and learn to manage self harming behaviours often associated with emotional dysregulation. DBT combines standard cognitive behavioural techniques for emotion regulation and reality testing with concepts of mindful awareness, distress tolerance and acceptance. DBT can be used to help people who experience symptoms of impulsivity, frequent interpersonal conflict, difficulty with emotional regulation, anger and poor coping in stressful situations.
